SUMMARY

Software Engineering student focused on modern cloud infrastructure, DevOps, and AIOps. Currently working as a System Infrastructure Intern at Beko Corporate, gaining hands-on experience in SCCM modernization, AI-driven ticket classification, and enterprise infrastructure automation. Previously contributed to AIOps workflows and observability pipelines through the PREP Program at Beko. Skilled in Python, FastAPI, Docker, AWS, Terraform, and Ansible for building scalable, production-ready systems.

EXPERIENCE

Beko Corporate

Jun 2026 – Present

System Infrastructure Intern (FreshStart 2026)

Remote

- Working on SCCM modernization and patch management optimization for enterprise endpoint infrastructure.
- Built an n8n-based Jira ticket classification system (Dispatch) using Azure OpenAI GPT-4.1-mini and PGVector across 60k+ records.
- Developed Azure Reserved Instance expiry monitoring workflows via Power Automate with Adaptive Cards to Microsoft Teams.
- Handling Microsoft Intune application packaging and deployment for enterprise software distribution.

Beko Corporate

Dec 2025 – Jun 2026

AIOps Engineer (PREP Program)

Remote

- Set up monitoring, anomaly detection, and alerting workflows for operational systems, helping reduce false-positive alert noise by 35%.
- Wrote Python-based automation scripts to streamline production-oriented processes and reduce manual investigation effort.
- Analyzed observability metrics to improve alert accuracy, system visibility, and incident response times for 10+ critical services.
- Implemented AIOps workflows using Isolation Forest and time series forecasting for proactive anomaly detection.

Freelance & Personal Projects

Jun 2023 – Present

Cloud & DevOps Engineer

Remote

- Designed and developed robust RESTful APIs using Python and FastAPI to support scalable backend architectures.
- Automated containerized application deployments using Docker and GitHub Actions for streamlined CI/CD workflows.
- Used Terraform and Ansible to provision and manage cloud infrastructure for repeatable and scalable deployments.

Elmar Yazılım

Sep 2023 – Oct 2023

Software Developer & Automation Intern

Elazığ

- Developed customized Python automation scripts to streamline internal operational workflows and reduce manual tasks.
- Executed process improvement initiatives through advanced scripting and automated data processing.

TECHNICAL SKILLS

Languages: Python, SQL, Bash, C#, TypeScript

Cloud & DevOps: AWS, Azure, Docker, Terraform, Ansible, GitHub Actions, CI/CD, Linux

Backend: FastAPI, REST APIs, Microservices, n8n

Observability / AIOps: Prometheus, Grafana, Anomaly Detection, Monitoring, Alerting

Data / Infra: PostgreSQL, PGVector, ClickHouse, Redis, Data Pipelines

Enterprise: SCCM, Intune, Power Automate, Azure OpenAI

SELECTED PROJECTS

GhostCost | ghostcost.com

Python, FastAPI, AWS, Docker

- Built a cloud cost optimization SaaS platform that analyzes AWS billing signals to surface infrastructure waste and actionable savings.
- Implemented detection modules for EC2, RDS, EBS, S3, Lambda, ECS, and network resources with a deterministic rule engine.
- Designed a PriorityEngine with adaptive thresholds and action playbooks for automated cost recommendations.
- Achieved 160+ passing tests with full CI/CD pipeline and Docker-ready deployment.

Star-Ops | github.com/omercangumus

Python, FastAPI, React, Docker, PostgreSQL

- Designed an AIOps/Edge-MLOps architecture for autonomous spacecraft health monitoring with 6-satellite simulation.

- Implemented anomaly detection ensemble (Isolation Forest, LSTM Autoencoder, SPC/EWMA) achieving 88.7% detection accuracy.
- Built KS-test drift detection and PSI analysis modules for real-time model performance monitoring in edge environments.
- Submitted abstract to IAC 2026 (D1 session) for international peer review.

Coderun

Flutter, Next.js, FastAPI, PostgreSQL, Docker

- Building a gamified coding education platform (Duolingo-style) with Python, DevOps, and Cloud learning tracks.
- Developed mobile (Flutter) and web (Next.js) frontends with a FastAPI backend and Docker-based code sandbox.
- Designed interactive lesson types including fill-in-the-blank, drag-and-drop, spot-the-bug, and live code execution via Pyodide.

Open-Source Contributions | bradygaster/squad

TypeScript, Node.js, AI Agents

- Contributing to a TypeScript/Node.js AI agent monorepo with multiple PRs approved and merged.
- Enforcing strict code quality standards: diff hygiene, honest regression documentation, and squashed commits.
- Collaborating with maintainers through rigorous code review cycles following open-source best practices.

AWARDS

- 2025
- 1st Place – Eastern Anatolia Region, Turkcell Code Night Hackathon
- 2025
- TEKNOFEST Competitor, AI-Supported Airline Route Optimization (Sky&Data)

CERTIFICATIONS

- 2026
- AWS Cloud Practitioner Essentials, Amazon Web Services
- 2026
- AWS Observability, Amazon Web Services
- 2026
- Machine Learning in Production, DeepLearning.AI
- 2026
- Evaluating & Debugging Generative AI, Weights & Biases
- 2026
- Automated Testing for LLMOps, CircleCI
- 2026
- CI/CD Fundamentals with GitHub Actions, Microsoft
- 2026
- Introduction to DevOps, Microsoft

VOLUNTEERING

Habitat Association

2025 – Present

Financial Literacy Trainer

Türkiye

- Delivered financial literacy trainings as part of a social impact project by Habitat Association in collaboration with Allianz and UNDP, helping young people improve budgeting, saving, and financial decision-making skills.
- Reached 100+ students across Türkiye through interactive sessions focused on economic empowerment and financial awareness.

EDUCATION

Fırat University

2024 – Present

B.Sc. in Software Engineering | Elazığ

Gümüşhane University

2023 – 2024

B.Sc. in Software Engineering (Transfer) | Gümüşhane
