SUMMARY

Software Engineering student focused on modern cloud infrastructure, DevOps, and AIOps. Currently working as a Part-Time AIOps Engineer at Beko Corporate, gaining hands-on experience in building reliable cloud-native systems, observability workflows, and automation pipelines. Skilled in using Python, FastAPI, Docker, AWS, and Terraform to build scalable, production-ready backend systems.

EXPERIENCE

Beko Corporate

Dec 2025 – Present

Part-Time AIOps Engineer

Remote

- Set up monitoring, anomaly detection, and alerting workflows for operational systems, helping reduce false-positive alert noise by 35%.
- Wrote Python-based automation scripts to help streamline production-oriented processes and reduce manual investigation effort.
- Analyzed observability metrics to improve alert accuracy, system visibility, and incident response times for 10+ critical services.
- Implemented AIOps workflows using Isolation Forest and time series forecasting to proactively detect anomalies in operational metrics.

Freelance & Personal Projects

Jun 2023 – Present

Cloud & DevOps Engineer

Remote

- Designed and developed robust RESTful APIs using Python and FastAPI to support scalable backend architectures.
- Automated containerized application deployments using Docker and GitHub Actions for streamlined CI/CD workflows.
- Used Terraform to provision and manage AWS infrastructure for repeatable and scalable deployments.

Elmar Yazılım

Sep 2023 – Oct 2023

Software Developer & Automation Intern

Elazığ

- Developed customized Python automation scripts to streamline internal operational workflows and reduce manual tasks.
- Executed process improvement initiatives through advanced scripting and automated data processing.

TECHNICAL SKILLS

Languages: Python, SQL, Bash, C#

Cloud & DevOps: AWS, Azure App Service, Docker, Terraform, GitHub Actions, CI/CD, Linux

Backend: FastAPI, REST APIs, Microservices

Observability / AIOps: Prometheus, Grafana, Anomaly Detection, Monitoring, Alerting

Data / Infra: ClickHouse, Redis, Data Pipelines

SELECTED PROJECTS

GhostCost | ghostcost.com

Python, FastAPI, Azure, Docker, ClickHouse

- Built a cloud cost optimization platform that analyzes billing signals to surface infrastructure waste and actionable savings recommendations.
- Designed Docker-based backend services and deployed the application on Azure infrastructure.
- Integrated data processing pipelines to translate raw cloud billing metrics into clear optimization insights for users.

Cloud-Native Reliability Platform

Python, Prometheus, Grafana, Observability

- Built a reliability platform with Prometheus and Grafana to track service health across distributed systems.
- Set up monitoring workflows and metrics-driven dashboards for distributed backend microservices.
- Implemented observability workflows to improve service visibility and performance across cloud components.

AegisOps

Python, Isolation Forest, Prometheus, AIOps

- Created an AIOps-focused operational platform for proactive anomaly detection using Isolation Forest and forecasting algorithms.
- Enhanced monitoring workflows by integrating ML-driven intelligence and alert-oriented visibility features.
- Combined observability telemetry with decision-making logic to improve automated operational responses.

TerraLambda: Serverless Delivery Pipeline

Docker, Terraform, AWS Lambda

- Built a deployment pipeline for containerized AWS Lambda workloads using Terraform for repeatable infrastructure provisioning.

- Set up automated serverless deployment workflows using Docker and Terraform for consistent rollouts.
- Integrated automated testing into the CI/CD pipeline to support reliable continuous delivery.

CERTIFICATIONS

2026	AWS Cloud Practitioner Essentials , Amazon Web Services
2026	AWS Observability , Amazon Web Services
2026	Machine Learning in Production , DeepLearning.AI
2026	Evaluating & Debugging Generative AI , Weights & Biases
2026	Automated Testing for LLMOps , CircleCI
2026	CI/CD Fundamentals with GitHub Actions , Microsoft
2026	Introduction to DevOps , Microsoft

VOLUNTEERING

Habitat Association	2025 – Present
<i>Financial Literacy Trainer</i>	<i>Türkiye</i>
• Delivered comprehensive financial literacy training to over 100 students across Türkiye to promote economic empowerment.	

EDUCATION

Fırat University	2024 – Present
<i>B.Sc. in Software Engineering Elazığ</i>	
Gümüşhane University	2023 – 2024
<i>B.Sc. in Software Engineering (Transfer) Gümüşhane</i>
