SUMMARY

Fourth-year Software Engineering student focused on MLOps, AIOps and cloud infrastructure. Experience at Beko in anomaly detection, observability and enterprise automation. Developed Python-based ML services and containerized personal projects; contributed to CI/CD workflows and open-source tooling.

EXPERIENCE

Beko Corporate
Jul 2026 - Sep 2026

System Infrastructure Intern (FreshStart 2026)
İstanbul, Türkiye

- Developed an LLM-assisted workflow to classify enterprise service tickets using vector search.
- Automated cloud infrastructure monitoring and proactive notifications using Microsoft Power Platform.
- Packaged and deployed enterprise applications with Intune; supported endpoint management, SCCM and patching.

Beko Corporate
Dec 2025 - Jun 2026

AIOps Engineer (PREP Program)
Part-time, Remote

- Built Isolation Forest and time-series forecasting workflows to detect anomalies in system metrics.
- Tuned alert thresholds for 10+ critical services using metrics and log signals to address false-positive alerts.
- Automated Python workflows for operational investigations and root-cause analysis using metrics and logs.

Gambia Garden
May 2026 - Present

DevOps Engineer (Volunteer)
Remote

- Support deployment planning, environment configuration and CI/CD workflows.
- Review pull requests and release readiness across development and testing workflows.
- Identify credential, database and deployment risks with an international team.

SELECTED PROJECTS

Star-Ops | Personal Project - Simulated Satellite Telemetry
GitHub

Python, FastAPI, scikit-learn, PyTorch, PostgreSQL, Docker

- Built a six-satellite simulation with Isolation Forest, LSTM autoencoder and statistical process control for anomaly detection.
- Added model persistence, inference endpoints and scheduled retraining.

Cloud-Native Reliability Platform | Personal Project
GitHub

Python, Kubernetes, Terraform, AWS EKS, Prometheus, Grafana, GitHub Actions

- Built a personal telemetry platform with Z-score/EMA anomaly detection and Prometheus/Grafana monitoring.
- Defined Terraform configurations and Kubernetes manifests for AWS VPC/EKS.
- Implemented simulated restart and replica-scaling commands with undo interfaces.

GhostCost
ghostcost.com

Python, FastAPI, AWS, Docker

- Built a deterministic AWS cost-analysis engine covering compute, storage, databases and networking.
- Developed recommendation priorities with adaptive thresholds and action playbooks.
- Maintained 160+ automated tests and a Docker-ready CI/CD pipeline.

Ömer Can Gümüş

MLOps / AIOps / DevOps

OPEN-SOURCE CONTRIBUTIONS

Squad | TypeScript / Node.js AI Agent Framework

github.com/bradygaster/squad

- Contributed 19 merged pull requests covering CI/CD, release workflows and CLI/SDK fixes.
- Improved npm release workflows and GitHub Actions dependency pinning; added regression tests and changesets.

Selected PRs: #1710 | #1442 | #1465

TECHNICAL SKILLS

Languages & APIs: Python, SQL, TypeScript, FastAPI, PostgreSQL, vector search
Cloud & DevOps: AWS, Linux, Docker, Kubernetes, Terraform, GitHub Actions, CI/CD
ML & AIOps: Isolation Forest, LSTM autoencoders, anomaly detection, model persistence, retraining
Observability: Prometheus, Grafana, metrics, log analysis, alerting
Enterprise Automation: Microsoft Power Platform, Intune, SCCM
Foundational Knowledge: OpenShift, Argo CD

TECHNICAL PROGRAMS

Türkiye İş Bankası

Aug 2026 - Sep 2026

Data Analytics and Artificial Intelligence Fellow — Remote

- Developed an Oracle Explain Plan Analysis Assistant using Python and Streamlit.
- Built rule-based analysis for joins, scans and partition-pruning findings.
- Integrated an LLM to explain deterministic findings for expert review.

QNB Türkiye

Aug 2025

Online Intern (QNB 101 Program) — Remote

- Completed a program covering banking technology, fintech and digital transformation.

CERTIFICATIONS & TRAINING

Machine Learning in Production | DeepLearning.AI | 2026
AWS Observability | Amazon Web Services | 2026
AWS Cloud Practitioner Essentials | Amazon Web Services | 2026
JPMorgan Chase & Co. Software Engineering Job Simulation | Forage | 2026
Evaluating & Debugging Generative AI | Weights & Biases | 2026
Automated Testing for LLMOps | CircleCI | 2026
CI/CD Fundamentals with GitHub Actions | Microsoft | 2026
Introduction to DevOps | Microsoft | 2026

AWARDS

1st Place, Turkcell Code Night Hackathon, 2025

EDUCATION

Fırat University | B.Sc. in Software Engineering | 2024 - Present
Fourth-year student

Gümüşhane University | B.Sc. in Software Engineering | 2023 - 2024
Transferred to Fırat University

COMMUNITY

Habitat Association | Financial Literacy Trainer | 2025 - Present

- Delivered financial literacy sessions reaching 100+ students through an initiative involving Habitat Association, Allianz and UNDP.
